

For beautiful letterings: new Goldfaber Aqua Dual Marker Sets

The Goldfaber Aqua Dual Marker is equally suitable for creative trend themes and classic applications. For even more inspiration and great works of art, there are now three new lettering sets with six pens each for the "Seaside", "BoHo" and "Jungle" topics.

The soft, flexible brush tip is ideal for surface painting and drawing, while the thin, metal-framed fineliner tip with a line width of 0.6 mm is ideal for details, contours and fine lines. The odourless, acid-free and pH-neutral ink of the Goldfaber Aqua Dual Marker is water-based and therefore watercolourable. This is particularly interesting for all creative people who work with blends to conjure up great colour gradients on paper and really set the scene for artwork.

With the Goldfaber Aqua Dual Marker, Faber-Castell is making a further contribution to environmental protection: the barrel and caps are made of 100% recycled plastic and are developed and produced in the company's own production facilities in Germany. The packaging is made from carton made from recycled paper.
